

**IN THE CLAIMS:**

The text of all pending claims, (including withdrawn claims) is set forth below. Cancelled and not entered claims are indicated with claim number and status only. The claims as listed below show added text with underlining and deleted text with ~~strikethrough~~. When strikethrough cannot easily be perceived, or when five or fewer characters are deleted, [[double brackets]] are used to show the deletion. The status of each claim is indicated with one of (original), (currently amended), (cancelled), (withdrawn), (new), (previously presented), or (not entered).

Please CANCEL claims 9-12 without prejudice or disclaimer, and AMEND claims 1 and 5 in accordance with the following:

1. (Currently Amended) A grill unit, comprising:  
a plurality of grill pipes;  
water tanks connected to ends of the grill pipes to supply water into the grill pipes;  
covers to selectively open and close upper portions of the water tanks; and  
guide members respectively extending from inner surfaces of the covers toward insides of the water tanks to guide condensed water formed on the inner surfaces of the covers into the water tanks,

wherein the covers, when closed, are downwardly sloped toward the guide members to allow condensed water formed on the inner surfaces of the covers to flow down toward the guide members, and

each of the grill pipes has an extended part positioned between inclined parts connected with the water tanks, so that the extended part, on which food is placed, is lower than the water tanks.

2. (Original) The grill unit according to claim 1, wherein each cover has sides with connecting parts at a back of each side to hingedly connect each cover to upper portions of the water tanks, respectively, and each guide member is located at a lower portion of the inner surface of each cover, respectively, adjacent to the connecting parts.

3. (Cancelled)

4. (Original) The grill unit according to claim 1, wherein the covers are sloped in any one direction to allow condensed water formed on the inner surfaces of the covers to flow down.

5. (Currently Amended) A cooking apparatus, comprising:  
a cabinet having at least one heater to heat food; and  
a grill unit mounted on a top surface of the cabinet to support the food, the grill unit comprising:

a plurality of grill pipes,  
water tanks connected to ends of the grill pipes to supply water into the grill pipes,  
covers to selectively open and close open upper portions of the water tanks, and  
guide members respectively extending from inner surfaces of the covers toward insides of the water tanks to guide condensed water formed on the inner surfaces of the covers into the water tanks,

wherein the covers, when closed, are downwardly sloped toward the guide members to allow condensed water formed on the inner surfaces of the covers to flow down toward the guide members, and

each of the grill pipes has an extended part positioned between inclined parts connected with the water tanks, so that the extended part, on which the food is placed, is lower than the water tanks.

6. (Original) The cooking apparatus according to claim 5, wherein each cover has sides with connecting parts at a back of each side to hingedly connect each cover to upper portions of the water tanks, respectively, and each guide member is located at a lower portion of the inner surface of each cover, respectively, adjacent to the connecting parts.

7. (Cancelled)

8. (Original) The cooking apparatus according to claim 5, wherein the covers are sloped in any one direction to allow condensed water formed on the inner surfaces of the covers to flow down.

Serial No.: 10/706,926

9-12. (Cancelled)
